EXPERIENCE

- **Noa Technologies GmbH** Berlin, Germany
Senior Software Engineer *September 2017 – Present*

Noa's full-stack industrial IoT solution supports easily scalable management of moving assets along the entire asset lifecycle, enabling fleet operators to maximize efficiency and provide better user experience.

 - **Billing:** Assist with the implementation and deployment of billing related features.
 - **3rd Party Integration:** Implement service adapter API with Django Rest Framework for 3rd party booking services.
- **Freelancing & Consulting** Berlin, Germany
Senior Software Engineer *February 2016 – Present*

Freelance and consulting work for international clients, including a team collaboration SaaS tool, an NGO that builds health information systems for countries in Western Africa and a startup that offers software tools for creating cross platform TV applications.

 - **glutter.io:** CI setup, Python RESTful web API development & software architecture consulting, AWS setup.
 - **eHealth Africa:** Dev ops, Python development, JS development & software architecture consulting.
 - **smaf.tv:** Python RESTful web API & Elasticsearch development.
- **Rhodecode GmbH** Berlin, Germany
Senior Software Engineer *October 2014 – February 2016*

RhodeCode Enterprise is a source code management solution for enterprises. Behind-the-firewall, for Git, Mercurial & Subversion, cross-platform.

 - **Frontend Overhaul:** Partial rewrite and overhaul of the main product's frontend.
 - **VCS Features:** Implement server-side and vcs pull request merging feature.
 - **3rd Party Integrations:** Develop integration extensions for Redmine and Jenkins CI.
 - **Web Application Security:** Audit and improve web application security.
 - **Continuous Integration / Development:** Setup Jenking CI to automate quality checks.
- **Delivery Hero Holding GmbH** Berlin, Germany
Tech / Team Lead & Software Engineer *August 2011 – September 2014*

Delivery Hero Holding GmbH is an online food-ordering service operating in 40+ markets across five continents.

 - **Invoicing Service Architect & Tech Lead:** Design a global invoicing service solution and lead a team of 5 engineers through implementation and delivery.
 - **New Markets Launch:** Deliver 3 new country websites within the first 3 months of working for Delivery Hero.
 - **Feature Team Lead:** Lead a team of 8 engineers building features for the legacy Django platform.
 - **New Platform Design:** Design the next version of the platform following Clean Architecture principles, to allow better scaling of the software development team.
 - **B2B Tool Development:** Design, document and implement a RESTful API for the restaurant portal with Flask and SQLAlchemy.
 - **Code Quality Tool:** Develop internal code quality monitoring tool with Flask and Github API.
 - **Continuous Integration:** Introduce continuous integration (TravisCI) for the legacy Django platform.
